

Solid.Strong.Quiet.

A sound investment for your Home, with the solid feel of a concrete slab without the price tag. Sound won't travel through the floor, and will make your home peaceful and quiet.

Hebel PowerFloor

If you're about to build or renovate, your choice of floor can have a major impact on the tranquillity of your home. Often it's the things that we don't see that makes the difference to providing a great long term quality living experience, and what you have under your floor covering is an important investment in your home.

Creaks and poor sound insulation associated with standard particleboard flooring can result in noises from above becoming a major disturbance to peaceful living downstairs.

Hebel® PowerFloor is the creak-free, solid alternative with superior insulation against both impact and airborne noise to make your home a sanctuary.

KEEPING THE PEACE AND QUIET

Opting for standard particleboard flooring may result in a noisy house. Children running around upstairs, teenagers listening to loud music and dad watching footy on the home theatre system are often unexpected and unwelcome sounds that can easily carry from room to room and penetrate between levels.

Hebel PowerFloor is the creak-free solid alternative. Made from Autoclaved Aerated Concrete, PowerFloor reduces sound transmission between floors and also eliminates the squeaking, bouncing and noise often associated with non-masonry flooring substrates.

The combination of strength, thermal and acoustic insulation properties make PowerFloor an ideal choice for first floor and suspended ground floors as well as decks and balconies.

AUSTRALIAN MADE

With a proven track record of over 70 years use worldwide you can depend on Hebel. In Australia Hebel products and systems are designed, developed and warranted by CSR, one of Australia's oldest and most trusted companies.

THE RIGHT CHOICE

Your selection of floor is an important factor in your ongoing enjoyment of your home. Unlike other features it will be costly and difficult to change later.

A SOUND INVESTMENT

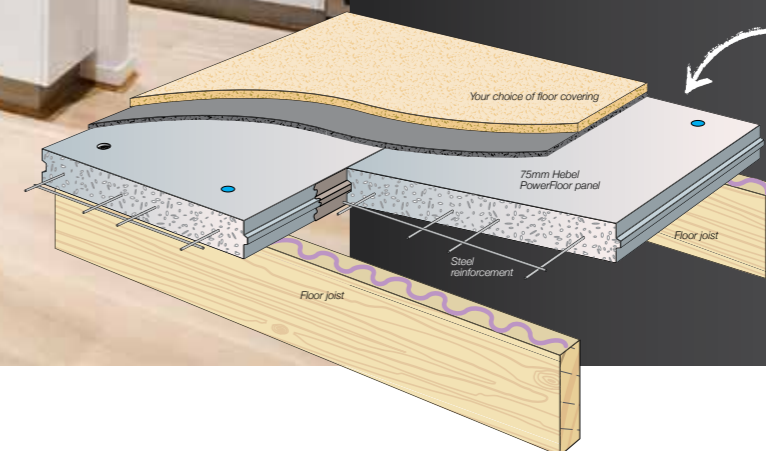

Hebel PowerFloor is an investment in a better standard of home living. Amortise the cost over 20 years* and you'll be glad you chose a solid quiet floor.

PowerFloor reduces the sound transmission from upper storeys

SOLID & FAST

PowerFloor is a highly versatile solid flooring system that gives you the feel of a concrete floor at a significantly lower cost. Installed over conventional joists, the system of thick panels fit snugly together to form a strong, smooth floor.

PowerFloor is simple and fast to install with less mess than concrete and less wastage than particleboard and timber flooring. It is easily installed by on-site trades, such as carpenters, so there are no delays to the building schedule. Also, it doesn't warp or rot if it gets wet

Hebel PowerFloor sits in between joists and your chosen floor covering

An innovative, sustainable and proven building product, Hebel PowerFloor has impressive benefits:

SOLID AND STRONG

Hebel 75mm steel reinforced PowerFloor panels are strong and provide the solid and secure feel of concrete under foot.

BETTER ACOUSTICS

Hebel gives you more peace and quiet. Hebel flooring systems significantly reduces sound transmission and noise transfer between floors and from external sources. Hebel is ideal for creating quiet zones.

COMFORTABLE LIVING ENVIRONMENT

Hebel PowerFloor has excellent thermal resistance and thermal mass which means there is less reliance on heaters or air conditioners, helping to save money on energy bills and is kinder to the environment, too.

FAST TO CONSTRUCT & COST EFFECTIVE

Hebel is simple and fast to install over conventional joists with less mess and cost than concrete and less waste than particleboard and timber flooring. It is easily installed by on-site trades such as carpenters, so there are no delays to the building schedule as it is unaffected by wet weather.

FIRE RESISTANT

Hebel AAC panels are non-combustible and the PowerFloor system achieves a Fire Resistance Levels (FRLs) up to 90 minutes from above, up to 90 minutes from below (with approved CSR Gyprock ceiling) and meet or exceed the requirements for all six Bushfire Attack Level (BAL) categories. It's the safe choice in flooring.

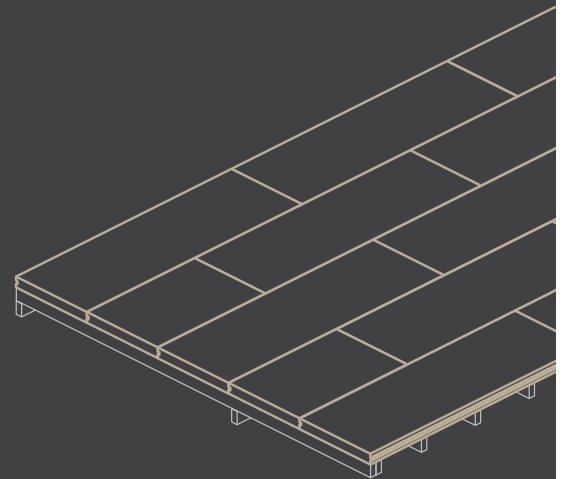

SUSTAINABILITY FOR A BETTER WORLD

Hebel is an environmentally friendly choice of building material, treading lightly on this planet. Manufactured in Australia, Hebel is made using readily available raw materials. Waste generated in the manufacturing process is recycled back into the product.
